

ACTIVITY 9 SUBMISSION

LinkedIn Profile Optimization & Attracting Recruiters

Name:	Trivikram Kalagi
Student Reference No.:	R25EJ164
Program:	B.Tech CSIT (2nd Year)
Institution:	REVA University, Bengaluru
Expected Graduation:	May 2029
LinkedIn Profile:	https://www.linkedin.com/in/trivikram-kalagi-571289371/
Activity Name:	Activity 9 — LinkedIn Profile Optimization
Reference:	Instagram carousel @debugging_life.js — 'How to fix your LinkedIn
Date of Submission:	September 30, 2026

SECTION 1 — Custom Headline (Optimized)

Carousel Tip (Slide 2): "Your headline says what to hire you for. Formula: [Role] | [stack] | [Building what] | [proof/audience]. Specific attracts, vague repels. Never 'Student at XYZ'."

Old Headline	B.Tech CSIT @ REVA University AI Developer GSSoC '26 Contributor
New Headline (Live)	Aspiring ML & GenAI Engineer Python · C++ · NumPy Building AI-Powered Projects G

Why it works: Includes target role (Aspiring ML & GenAI Engineer), tech stack (Python, C++, NumPy), what you're building (AI-Powered Projects), proof (GSSoC'26, 3× Hackathon Winner), and institution (REVA University). All recruiter search keywords included.

Screenshot Proof — Live Headline + About:

SECTION 2 — About Section (Sell the Click)

Carousel Tip (Slide 3): "The goal is not to introduce yourself. The goal is to sell the click. Template: I help [who] [do what]. Right now I'm building [project+stack]. Open to [role]. You need one project, one stack, one ask."

"I help teams turn AI concepts into shipped, production-ready tools. As a 2nd-year CSIT student at REVA University and aspiring ML/GenAI Engineer, I've built a strong foundation in Python, C++, and NumPy, contributed to open source through GSSoC'26, and won 3 hackathons building real AI projects — including Litigo, an AI guardrail tool deployed live.

Right now I'm deepening my ML fundamentals, DSA, and Pandas while building more AI-powered projects. Open to Machine Learning / GenAI Engineering internships starting 2027.

■ trivikramkalagi91@gmail.com | ■ github.com/trivikramkalagi91-commits"

Why it works: Opens with value proposition (I help teams...), includes proof (3× hackathon, GSSoC, Litigo live), states current focus, and ends with clear ask (internships 2027) + contact links. No vague 'hardworking/passionate' fluff.

Screenshot Proof — About Section + Activity:

SECTION 3 — Skills, Projects & Experience

Carousel Tip (Slide 4 — Skills): "Delete vague skills. Keep the stack your target role searches for. Pin top 3."

Action	Details
Skills Added	C++, Git, NumPy (target ML/GenAI stack)
Skills Kept	Python, Machine Learning, Artificial Intelligence, Open Source Contribution
Total Skills	13 (up from 11) — all relevant to ML/GenAI Engineering roles

Carousel Tip (Slide 5 — Projects): "Treat like product page. Title = what + for whom. One line stack, one line result. Live demo + GitHub on every one."

Project	Details
Litigo — AI Guardrail Tool for LLM Applications	Stack: Python · GenAI · Vercel · GitHub Result: Hackathon-winning, deployed live Live: litigo

Carousel Tip (Slide 8 — Experience): "Freelance, open-source, content ARE experience. Every bullet: Built [what] with [stack] → [measurable result]."

Experience	Status
Social Media & Design Coordinator, AiFi Club	■ Kept (1 year — valid leadership experience)
Open Source Contributor, GSSoC'26	■ Active — demonstrates real coding experience

Education: REVA University · B.Tech CSIT · Sep 2025 – May 2029 ■

SECTION 4 — Summary of All Optimizations

#	Optimization Area	Action Taken	Status
1	Headline	Rewritten with target role, tech stack, proof points, and internship ask	Completed
2	About Section	Rewritten with value proposition, proof of work, and internship ask	Completed
3	Skills	Added C++, Git, NumPy; retained Python, Machine Learning, AI, Open Source	Completed
4	Projects	Added Litigo — AI Guardrail Tool with stack, results, live demo + GitHub links	Completed
5	Experience	GSSoC'26 Open Source Contributor + AiFi Club leadership both documented	Completed
6	Education	Confirmed REVA University · B.Tech CSIT · Sep 2025 - May 2029	Completed
7	Activity & Engagement	Active posting with project updates, GitHub links, and building-in-public content	Ongoing

Summary of All Optimizations

- Keyword-rich headline matching ML/GenAI Engineering recruiter searches
- Compelling About section with clear value proposition and internship call-to-action
- Technical skills aligned with target role (Python, C++, NumPy, Git, ML, AI)
- Projects section with deployed work, live demos, and GitHub repositories
- Documented experience through open-source contribution and club leadership
- Active content presence demonstrating continuous learning and building in public
