

ACTIVITY 10 SUBMISSION

LinkedIn Networking & Content

Name:	Trivikram Kalagi
Student Reference No.:	R25EJ164
Program:	B.Tech CSIT (2nd Year)
Institution:	REVA University, Bengaluru
LinkedIn Profile:	https://www.linkedin.com/in/trivikram-kalagi-571289371/
Activity Name:	Activity 10 — LinkedIn Networking
Date of Submission:	September 29, 2026

SECTION 1 — Published Reflective Post

Objective: Publish a genuine reflective post summarising academic progress, technical achievements, hackathon wins, and career goals.

*"This semester has been an incredible leap forward — I've maintained strong academic results with **SGPA 9.8 (Sem 1)** and **9.67 (Sem 2)**, mastered advanced Python + NumPy, and earned my first meaningful pull requests as a **GSSoC'26 contributor**.*

*I also secured **2 hackathon wins** building real-world AI projects:*

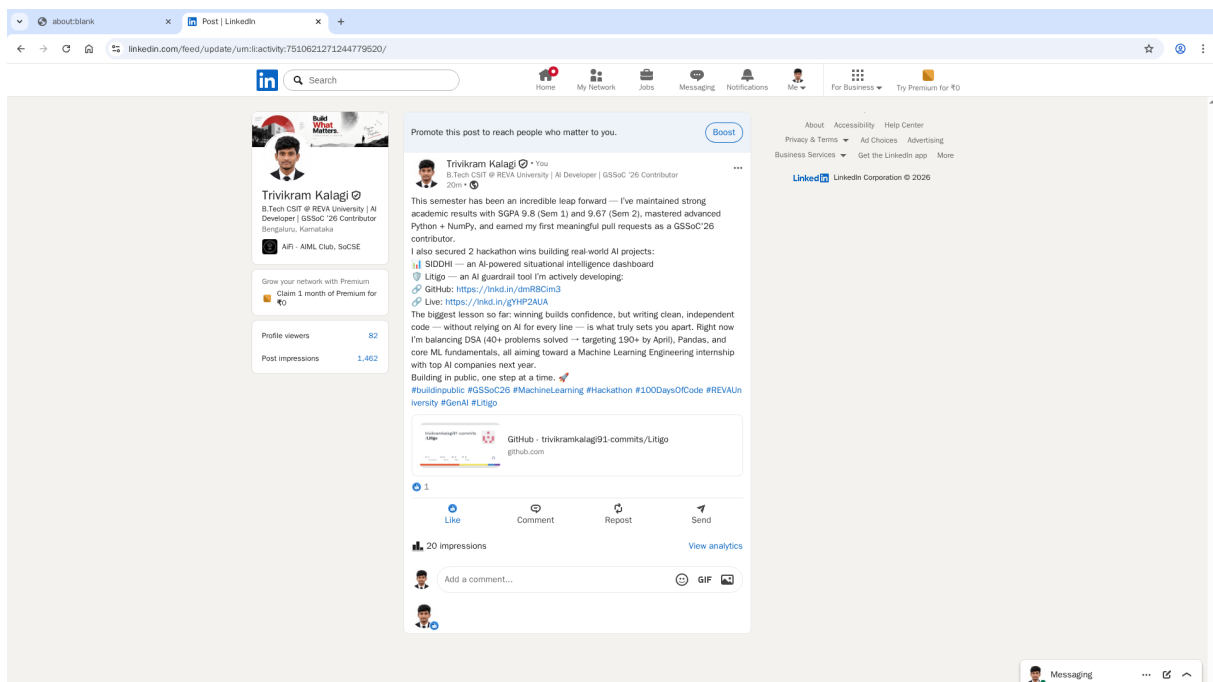

- **SIDDHI** — an AI-powered situational intelligence dashboard
- **Litigo** — an AI guardrail tool I'm actively developing:
- **GitHub:** <https://github.com/trivikramkalagi91-commits/Litigo.git>
- **Live:** <https://litigo-ai.vercel.app/>

*The biggest lesson so far: winning builds confidence, but writing clean, independent code — without relying on AI for every line — is what truly sets you apart. Right now I'm balancing DSA (40+ problems solved → targeting 190+ by April), Pandas, and core ML fundamentals, all aiming toward a **Machine Learning Engineering internship** with top AI companies next year.*

Building in public, one step at a time. ■

#buildinpublic #GSSoC26 #MachineLearning #Hackathon #100DaysOfCode #REVAUniversity #GenAI #Litigo"

SECTION 2 — 3 Personalized Connection Requests

Objective: Send 3 personalized connection requests to relevant ML/AI professionals outside REVA University.

#	Recipient	Role / Affiliation	Personalized Note Sent
1	Sai Harsha Yelleni	Software Engineer III @ Google AI/ML Engineer · IIT MTech	"Hi! I'm a 2nd-year CSIT student building AI projects and prepping for ML roles. Your work at Google in AI/ML is really inspiring — would love to connect and learn from your journey!"
2	Suhavani Pandey	AI/ML Undergrad GSSoC'26 Contributor	"Hi! Fellow GSSoC'26 contributor here 🙌 Building Litigo AI guardrails and deep diving into ML + DSA. Would love to connect, share progress, and collaborate down the line!"
3	Alok Saraswat	Senior AI/ML Engineer LLM · RAG · LangChain · GenAI Production	"Hi! I'm building my first GenAI projects and prepping for ML roles. Your insights on LLMs and RAG have been super helpful as I learn — would love to connect and follow your work!"

Screenshot Proof — Sent Invitations:

SECTION 3 — Companies & Professionals Followed

Objective: Follow 3 target companies and 2 active ML/AI professionals.

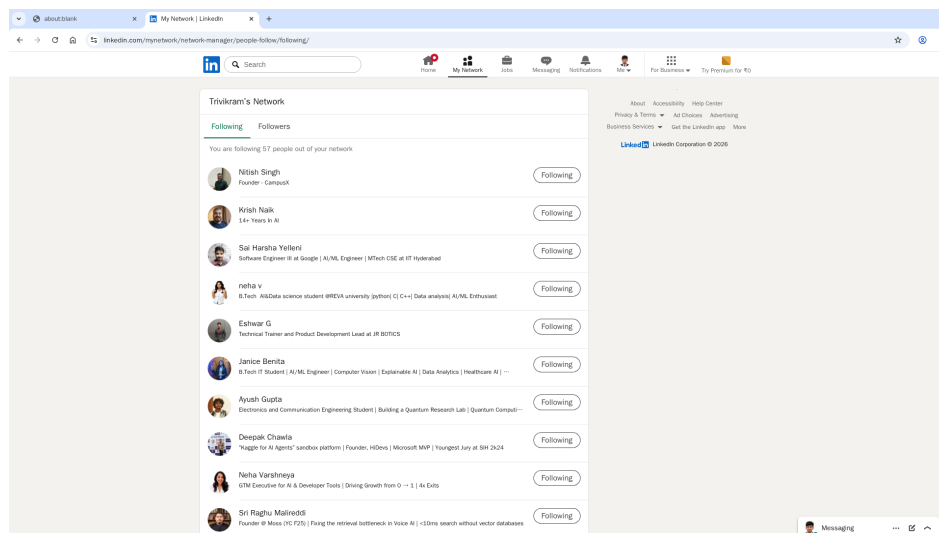

Companies Followed:

#	Company	Relevance	Status
1	Google	Top AI/ML employer · Dream Tier-1 target	■ Following
2	NVIDIA	Deep learning hardware + AI research leader	■ Following
3	Qualcomm	On-campus / off-campus ML internships open now	■ Following

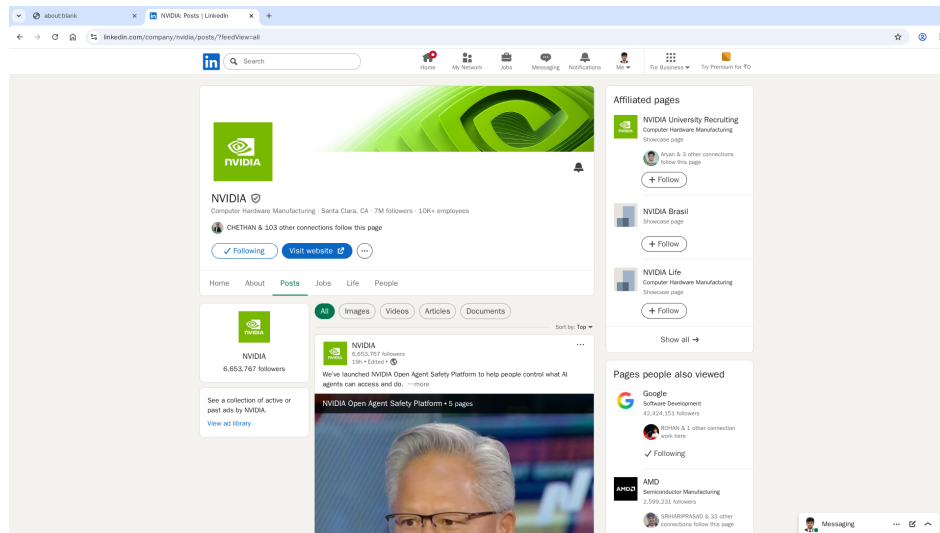

Professionals Followed:

#	Name	Role / Expertise	Status
1	Krish Naik	AI/ML Educator · 14+ years in AI · Active poster	■ Following
2	Nitish Singh	Founder, CampusX · ML/DS education leader	■ Following

Screenshot Proof (a) — Professionals Following List:

Screenshot Proof (b) — Company Page (NVIDIA + Google):

SECTION 4 — Meaningful Comment Posted

Objective: Leave a thoughtful, question-driven comment on a post from a followed professional — not generic praise.

Post Author	Krish Naik (14+ Years in AI · Educator)
Post Topic	AI Forward Deployed Engineer Bootcamp — moving from concepts to production
Comment Posted	"This is incredibly valuable! As a 2nd-year CSIT student currently building my first GenAI project, I'm curious — what's the single biggest gap you see students face when transitioning from 'knowing ML concepts' to actually shipping AI solutions in production?"
Why it works	Specific to my journey (2nd year, GenAI projects, moving past tutorials), asks a genuine question
